

The most immediate need is air and clean air is important to health. But today the air in our own homes-the air we breathe the most – may be the very worst air we are exposed to. We spend most of our time indoors. The air in your home can assist in supporting good health, for you and your family. And to help you breathe easier, Amega has a solution.

nourish your body and feed your senses

Aura of Scents

In AMAire Wellness therapy, Amega combines aromatherapy and air purification with a process that harnesses the properties of an energized water solution and the natural therapeutic qualities of essential oils. A revolutionary approach to enhancing air with concept of aromatherapy, an ancient form of holistic therapy, where the essence of nature offers support, healing and appreciation of the beauty that is before us – Aura of Scents. Using a carefully selected blend, the Aura of Scents aromatherapy oils are atomized into the air to help you relax, ease stress, or stimulate feelings of awakened desire, depending on your choice of oils.

AMAire Wellness Therapy

The Amega AMAire Wellness therapy unit is more than just an air purifier. It works as a humidifier, replacing moisture in the air, an ionizer, converting positive ions in the air into negative ions, and a nebulizer, atomizing essential oils into the air. The spectrum LED plate in the unit cycles softly through seven different colors providing a soft light with the therapeutic benefits of color. The Amega AMAire Wellness therapy unit can give you not just cleaner air, but can help make your home an environment of wellness.

*A revolutionary approach
to enhancing air*
